

Bring Your Own Chat

A secure, zero-knowledge chat webapp
using only a Dropbox account and a browser

typical webapp flow

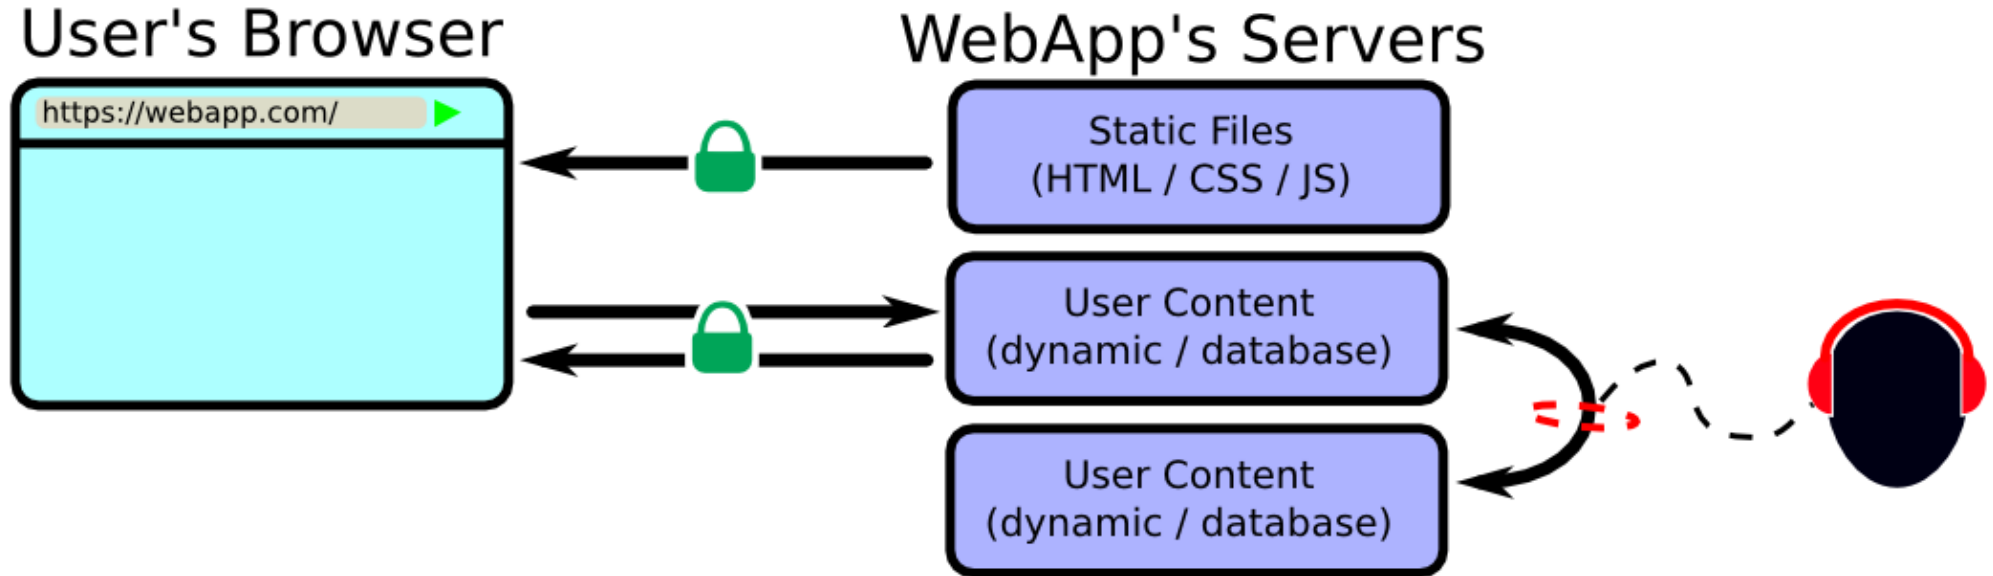

easy to tap

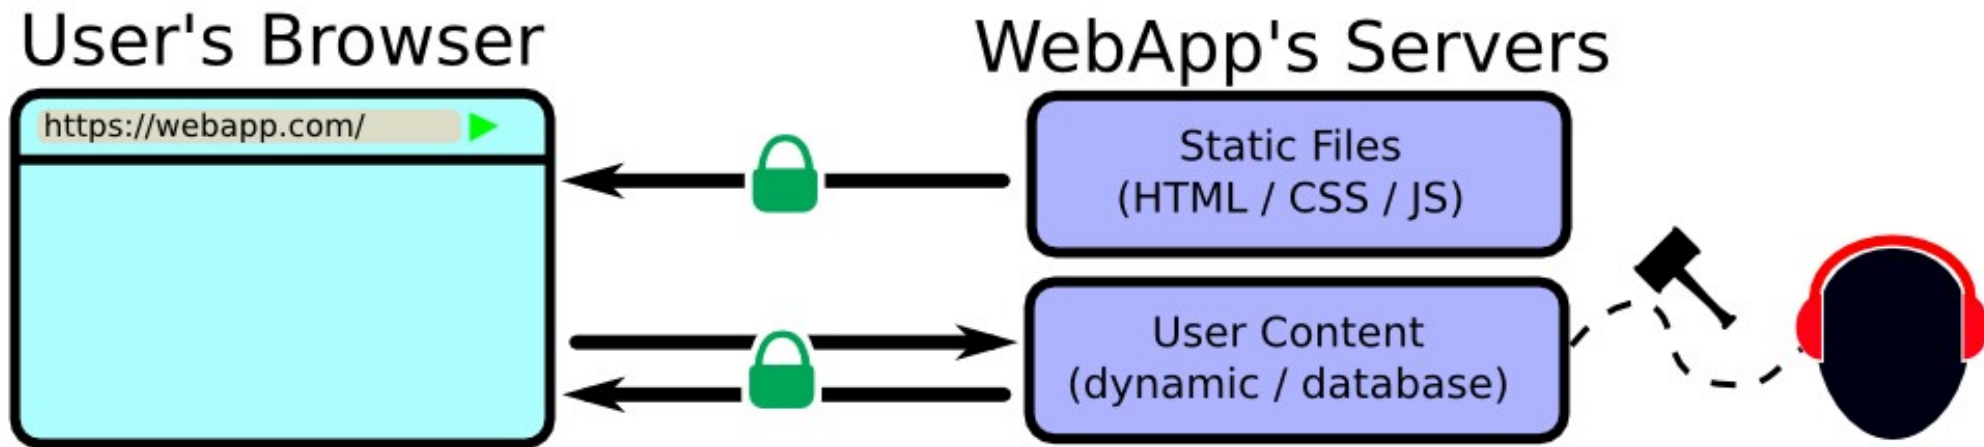

https to the rescue

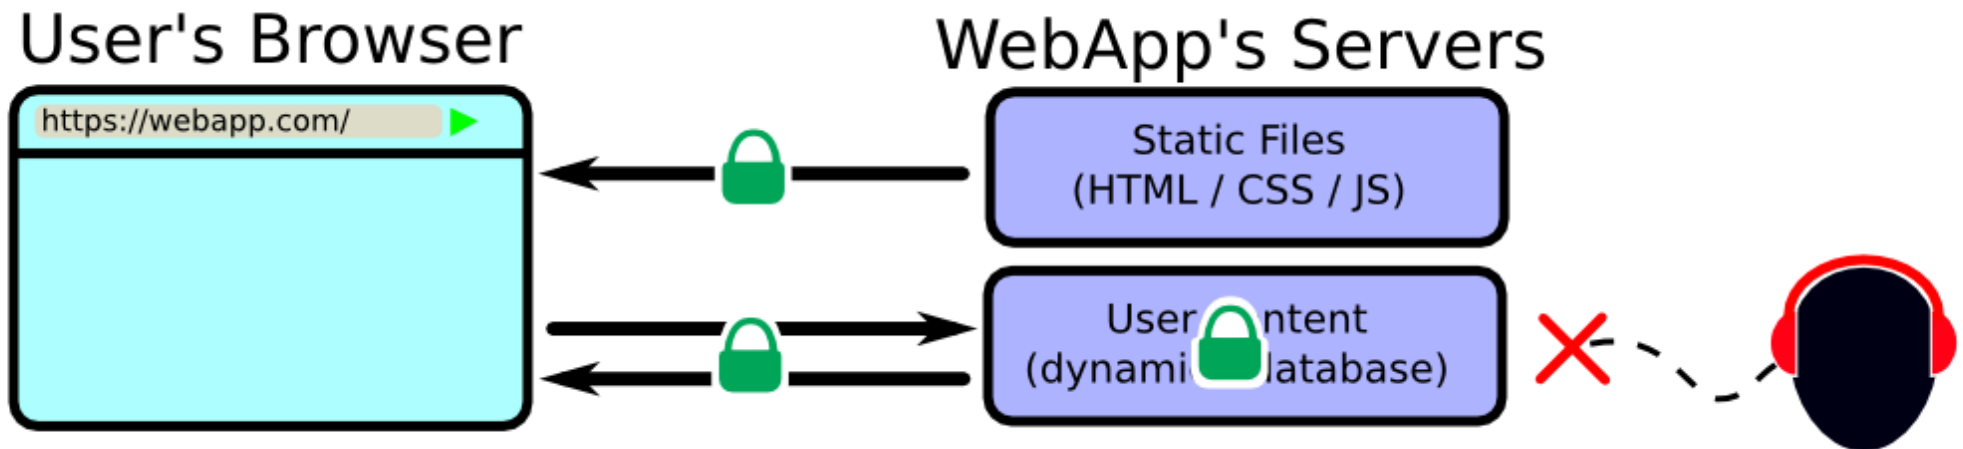

intra-company taps

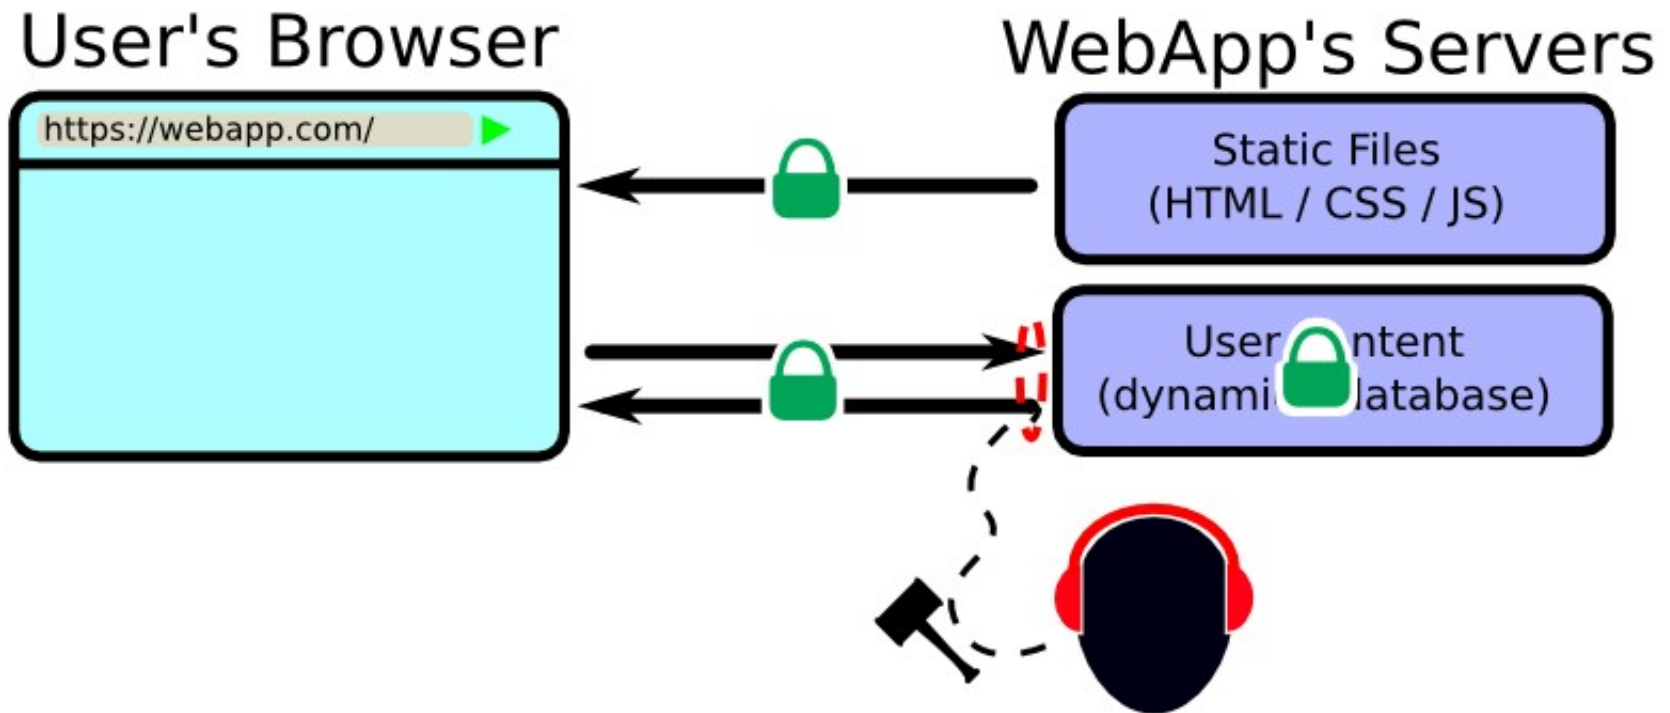

secret blanket court orders

internal encryption to the rescue

get ssl key via court order

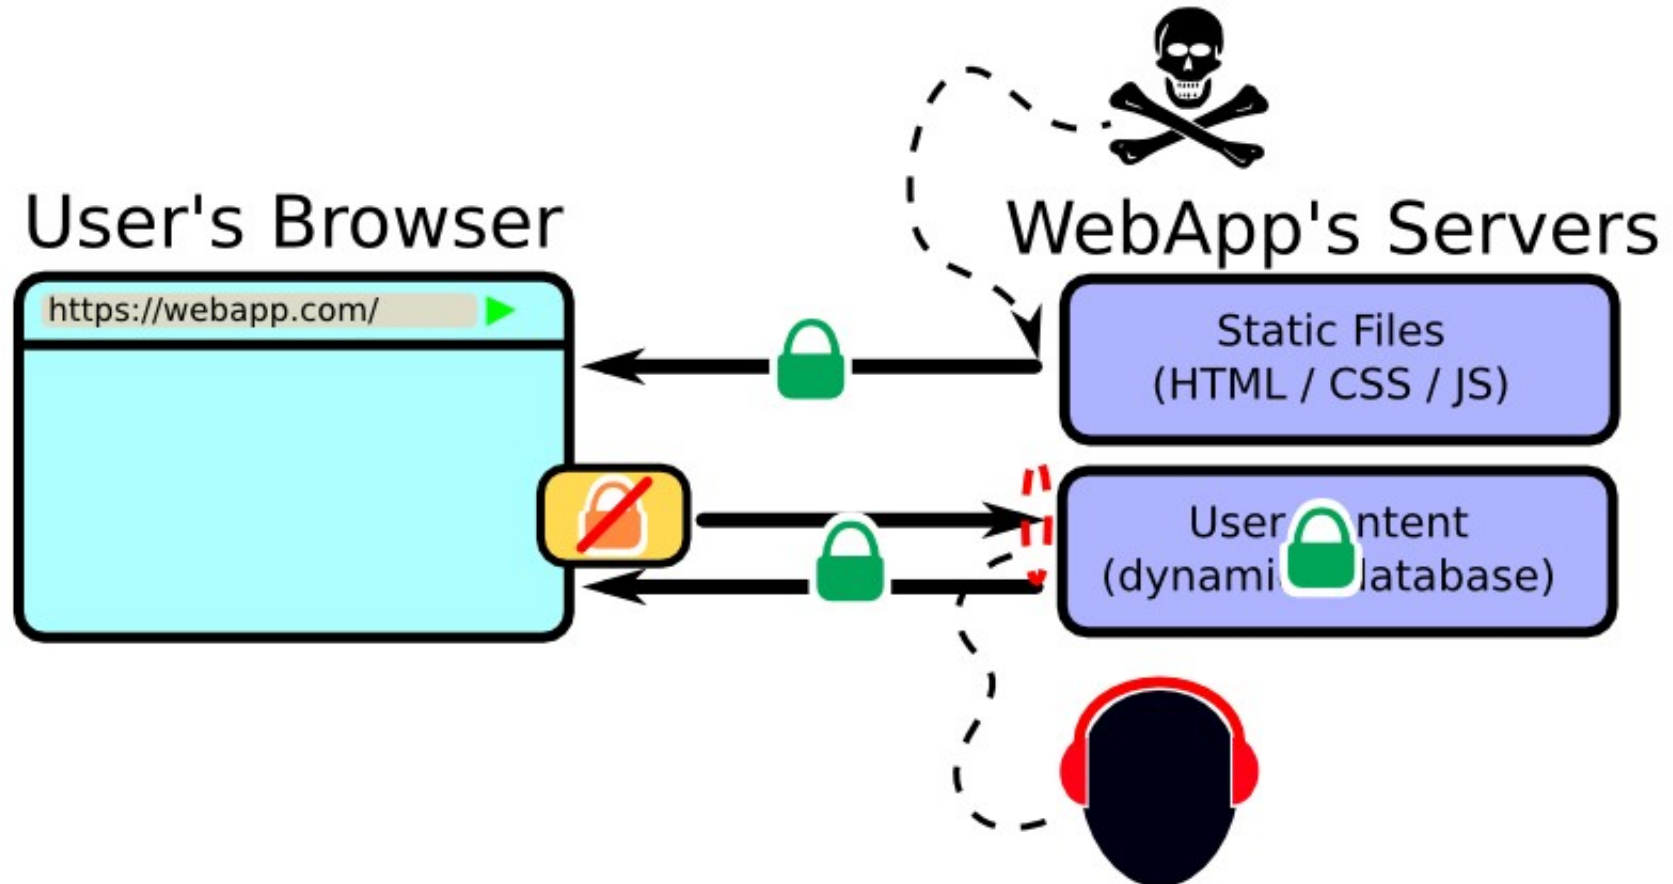

present day

client-side encryption to the rescue

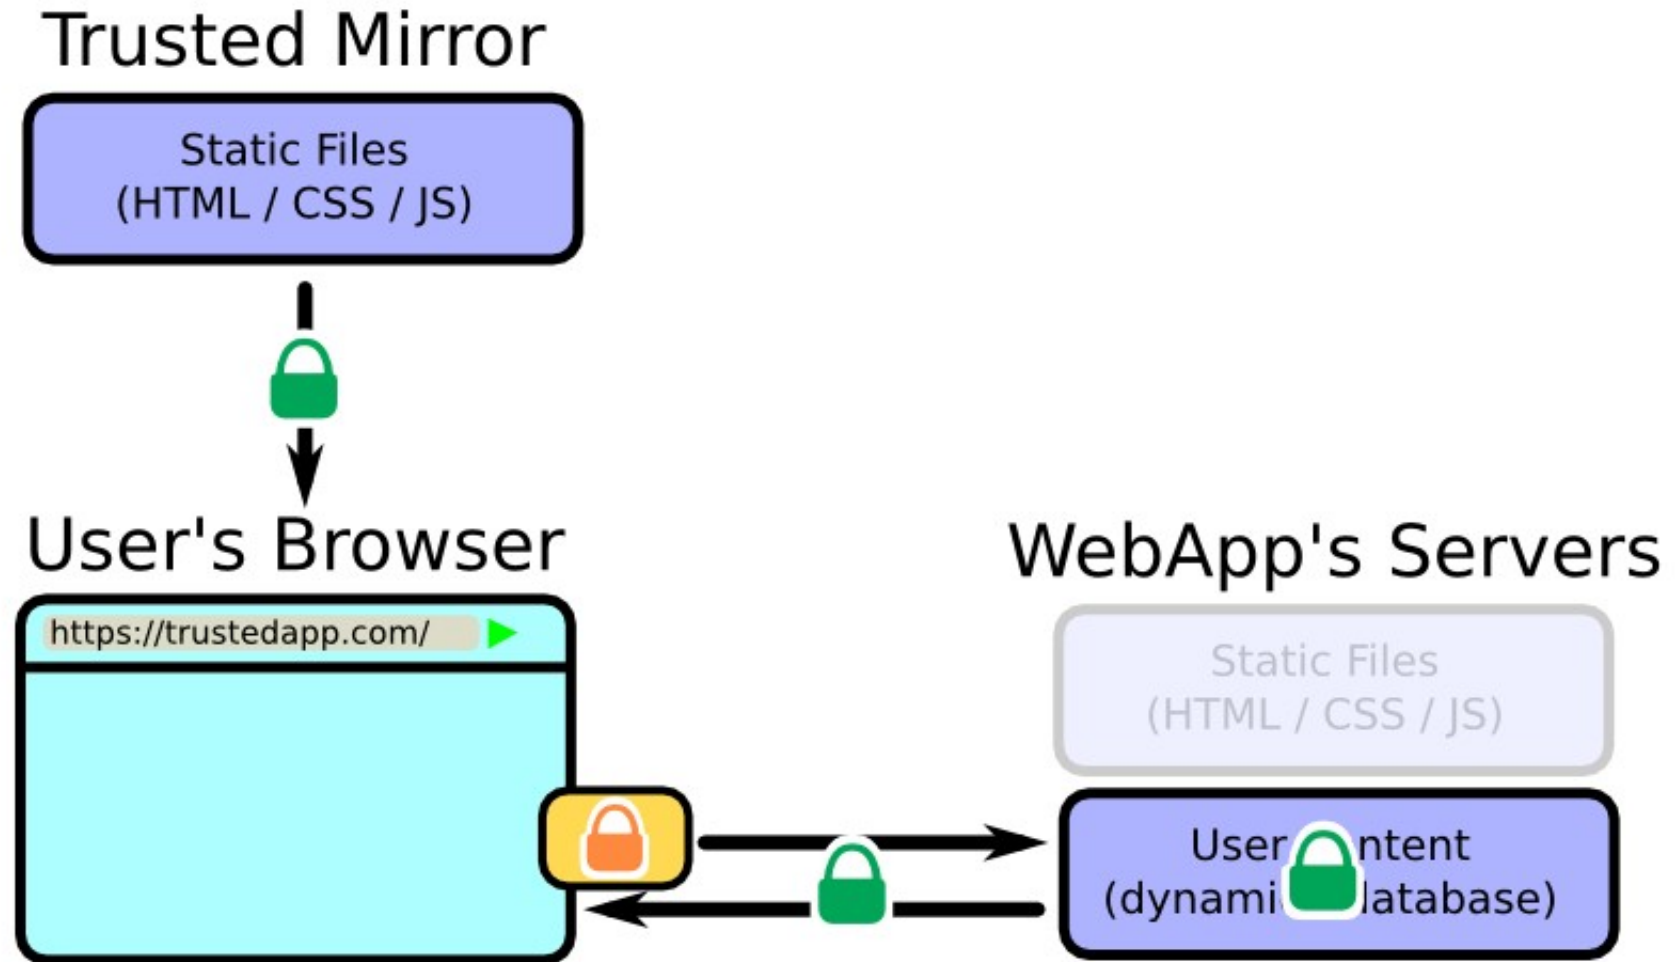

malicious javascript injection

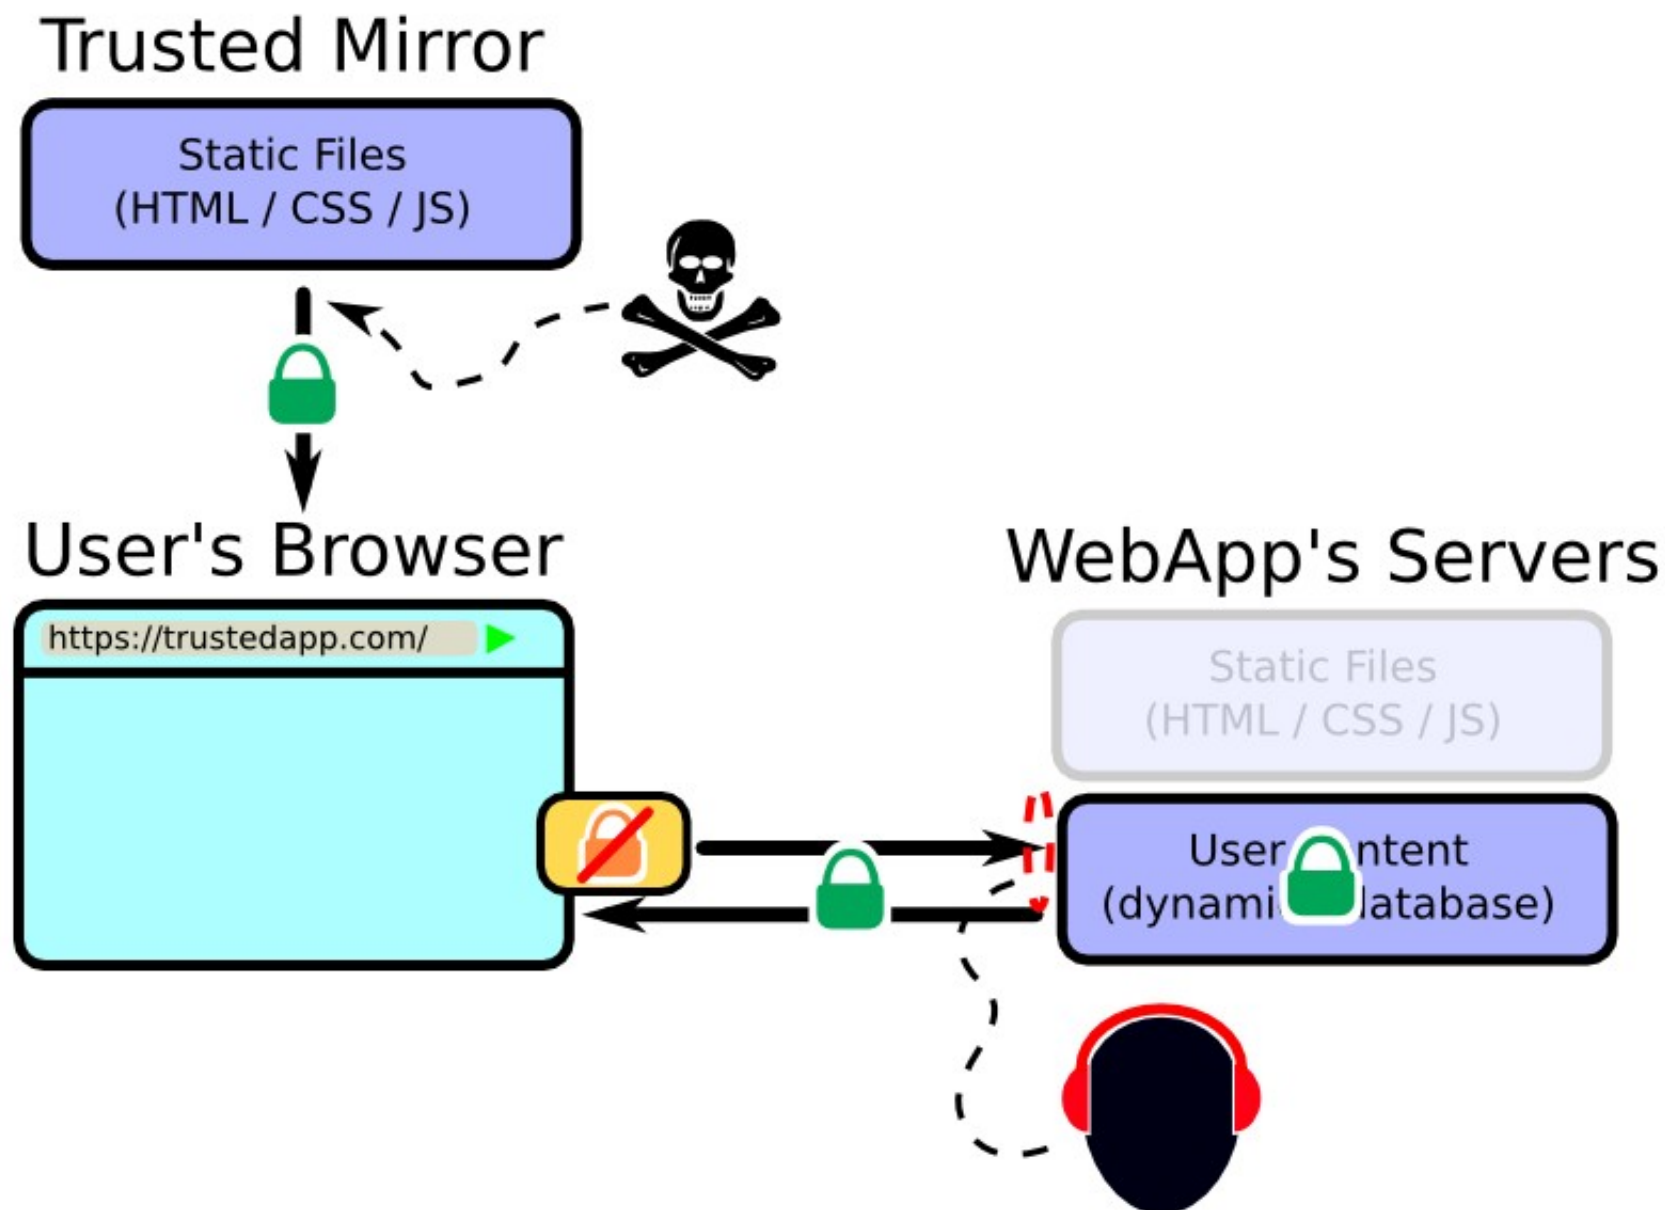

fundamental flaw of
client-side crypto

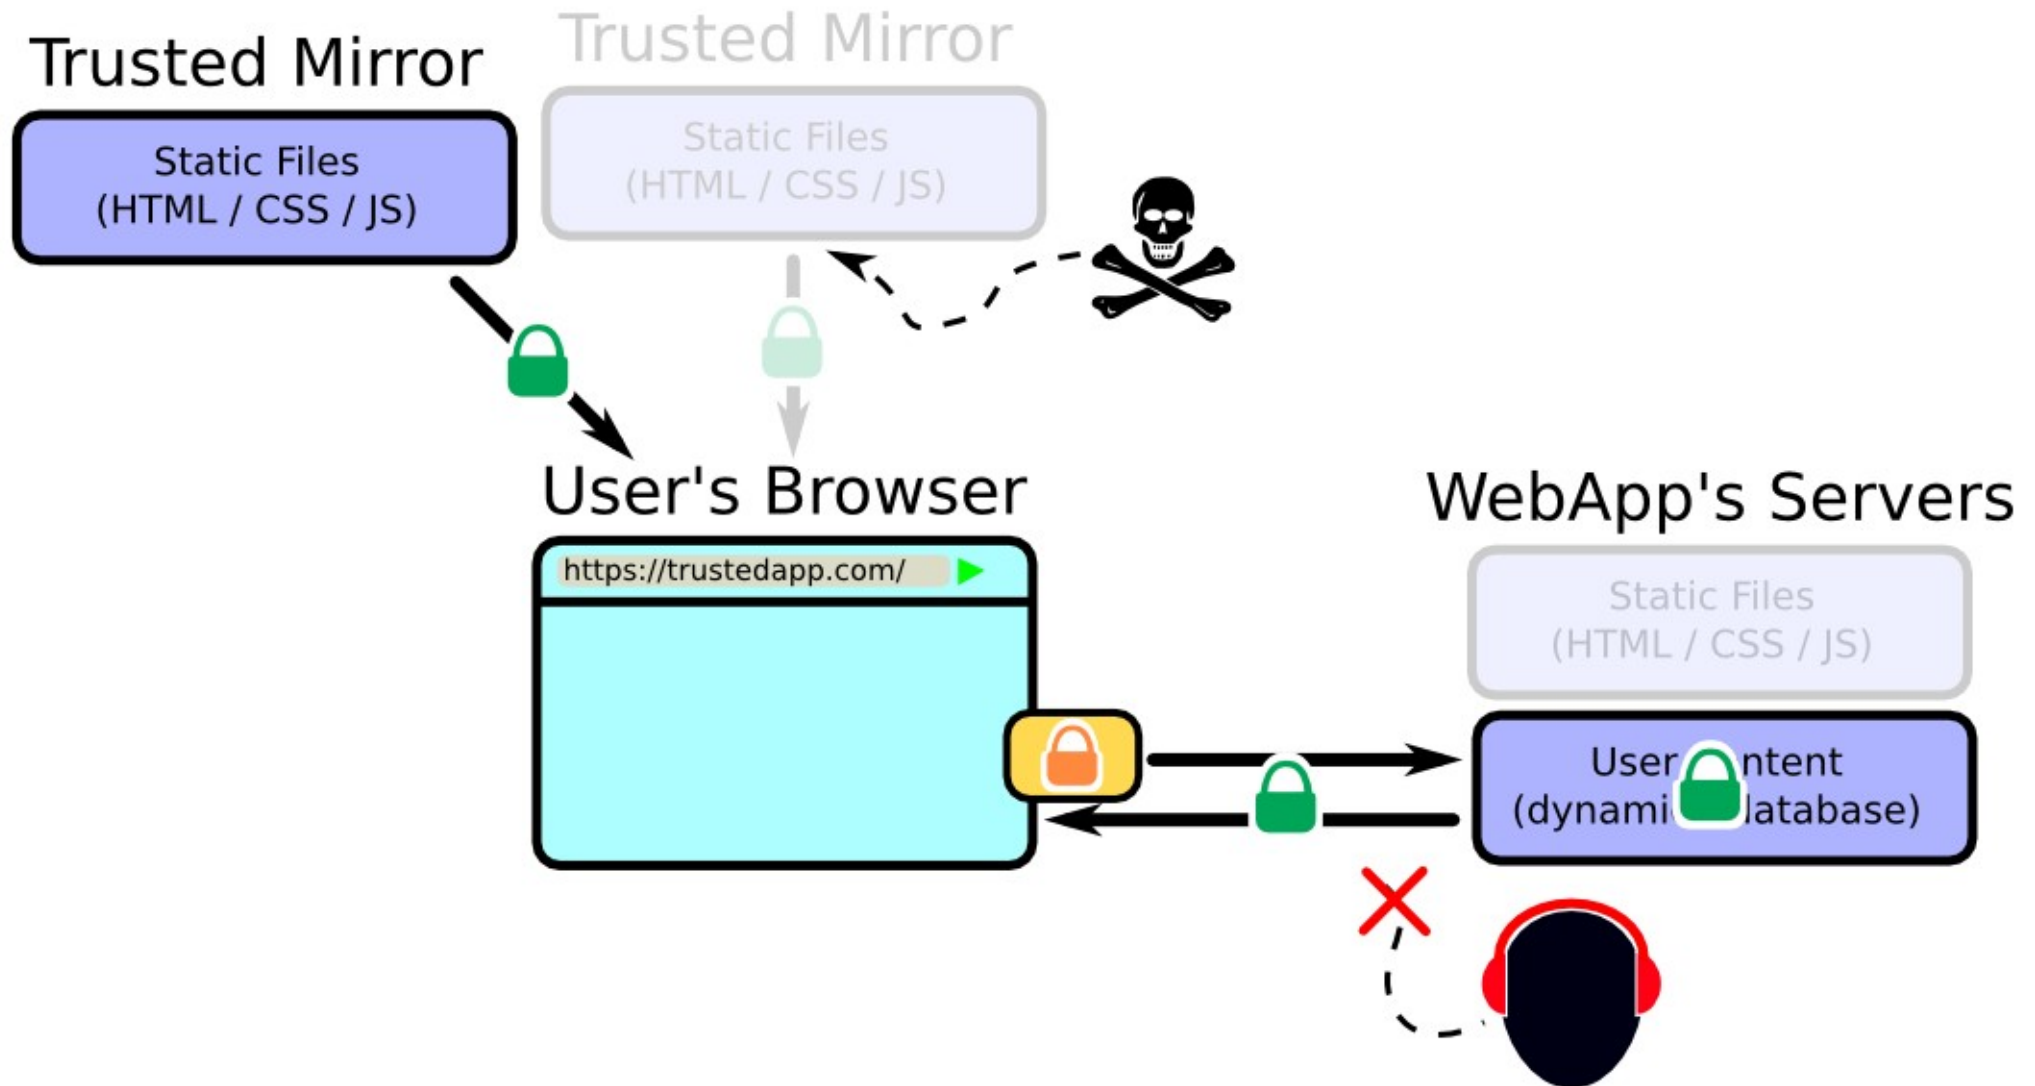

byoFS to the rescue

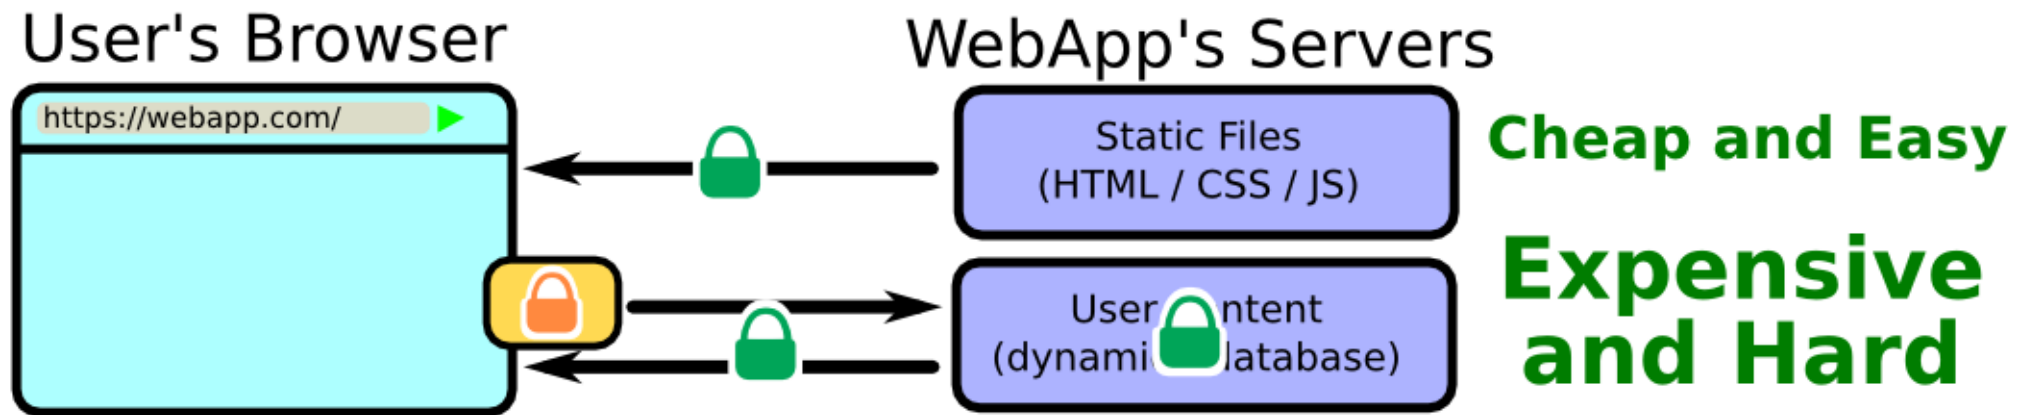

same fundamental flaw

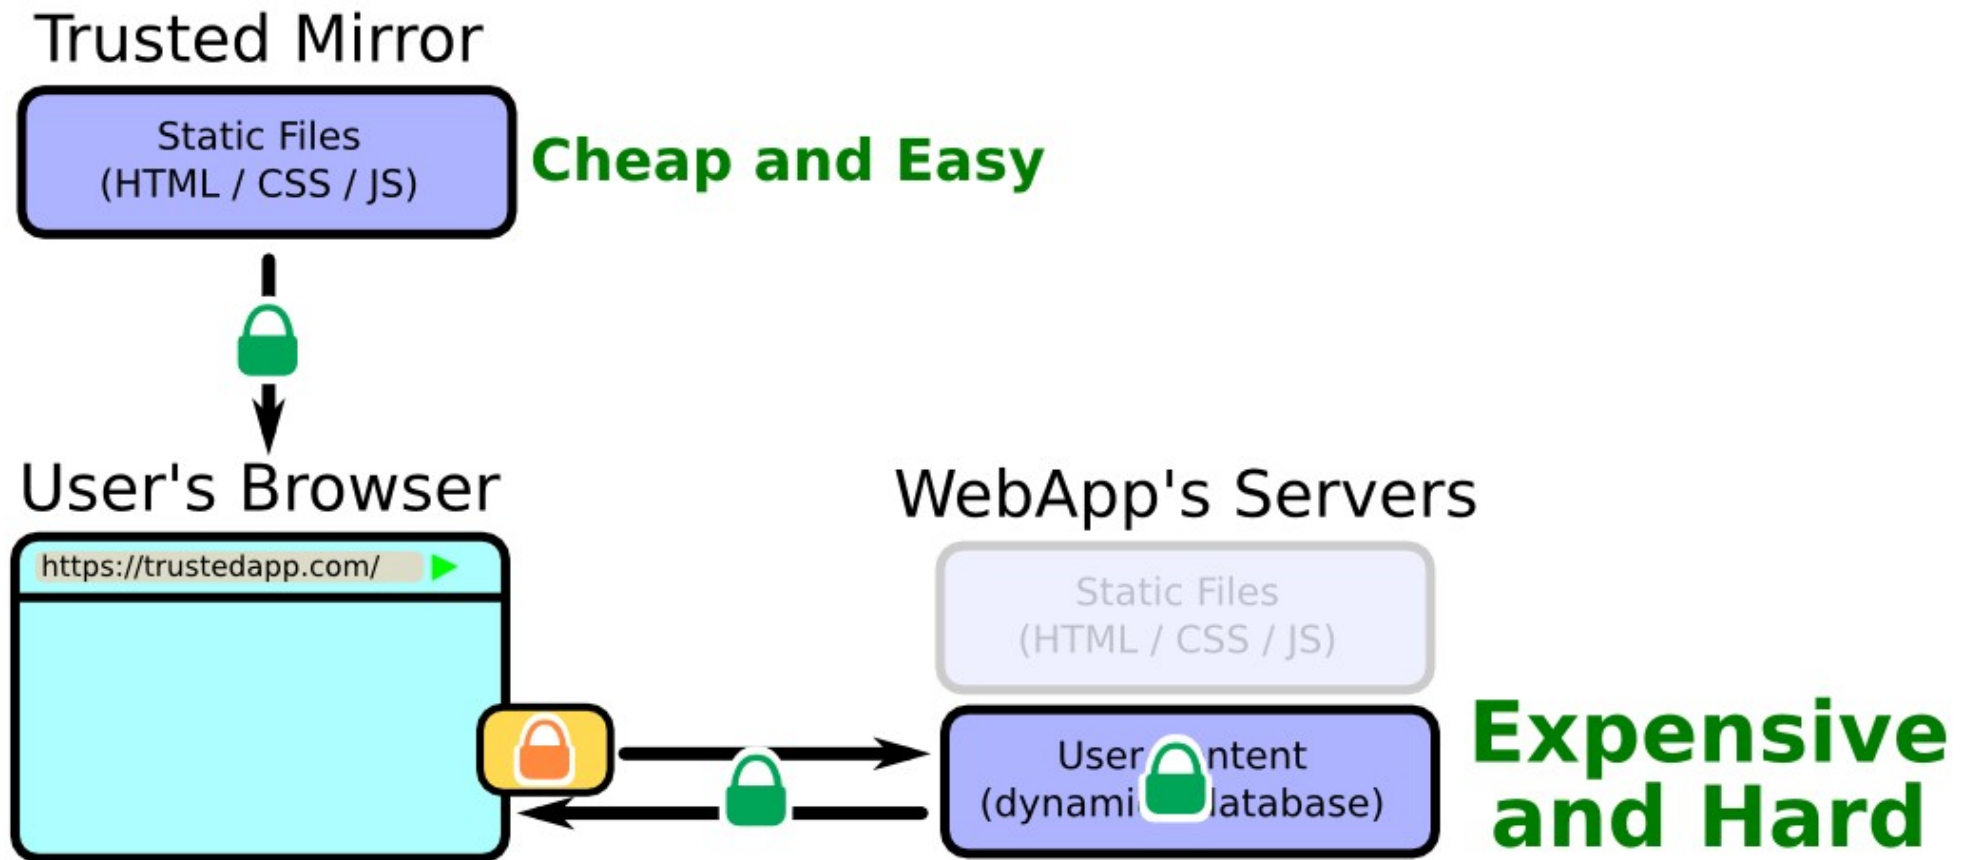

game of cat and mouse

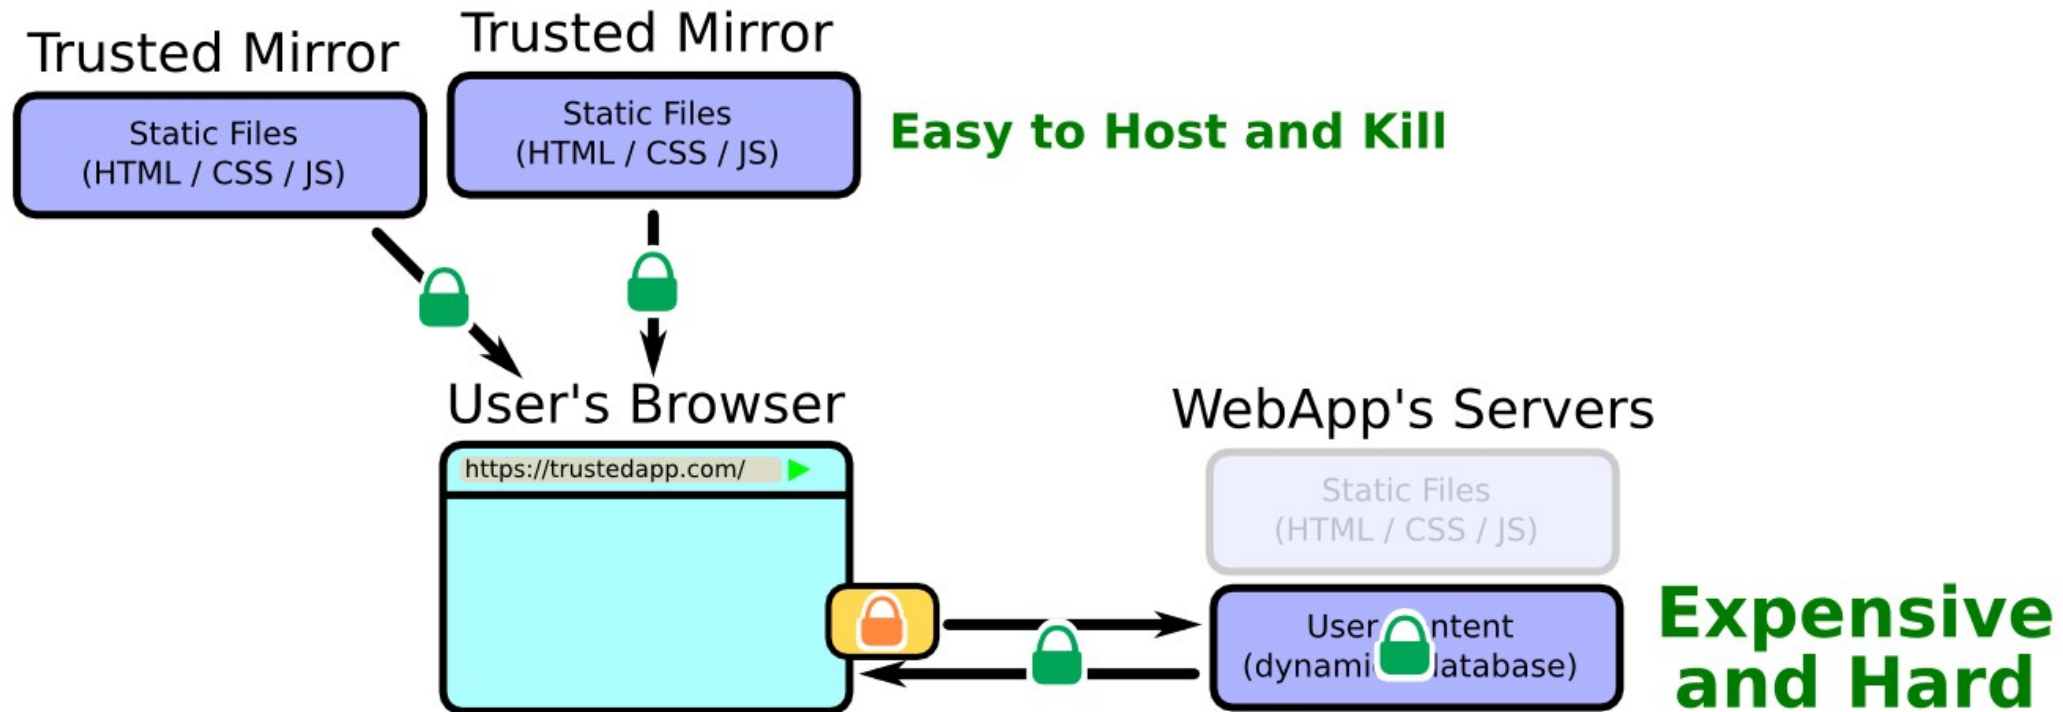

let's talk about money

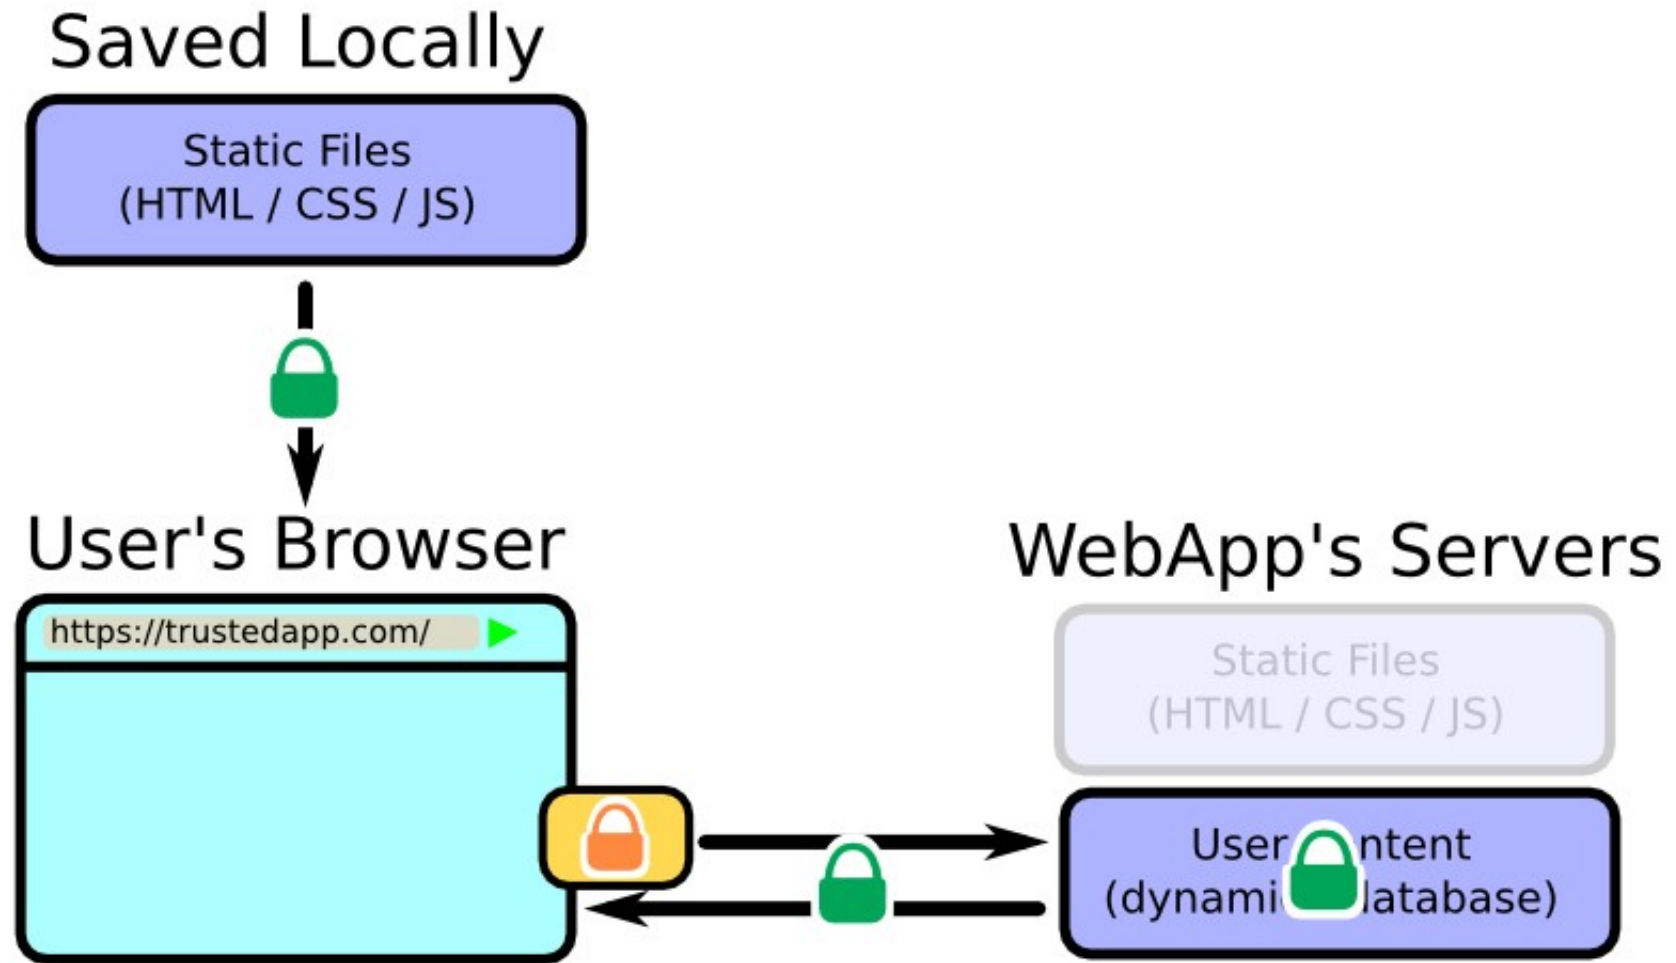

let's talk about money

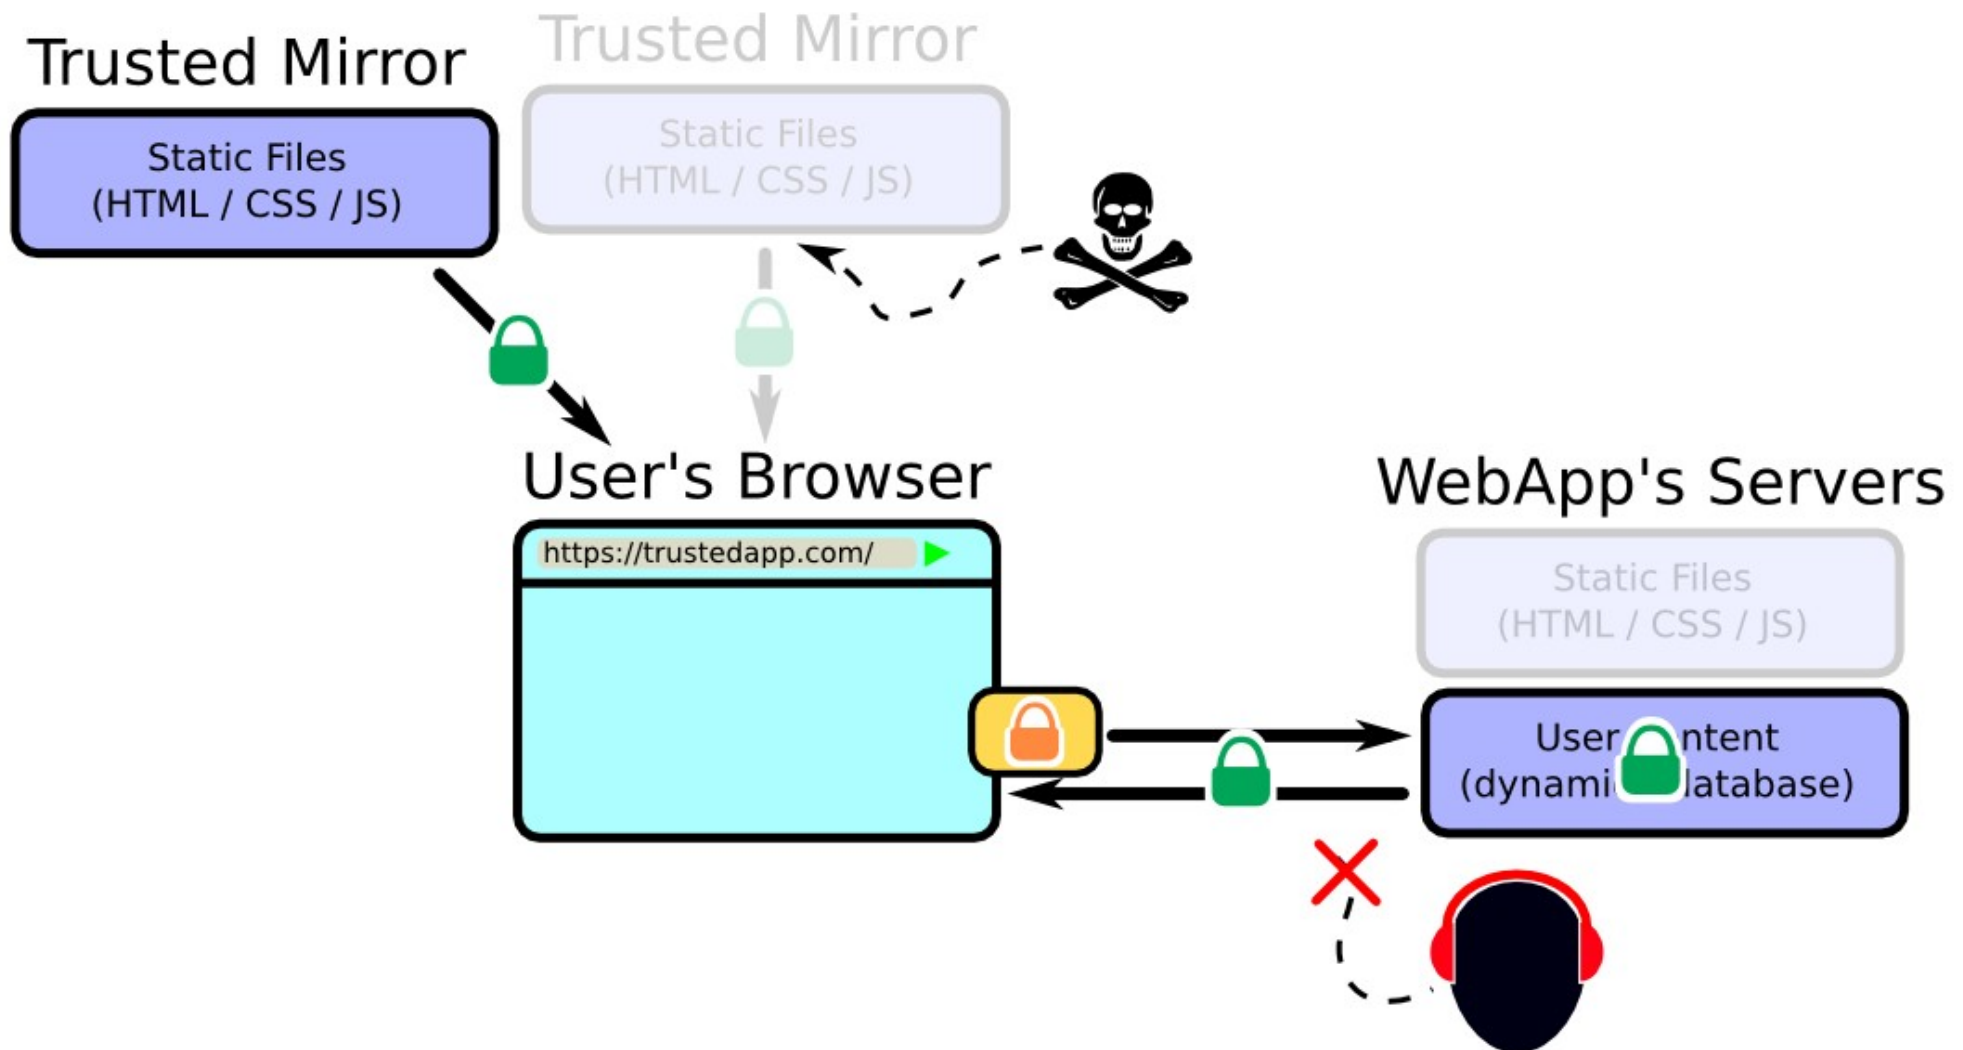

easy to host and kill

you can even save it locally

byoFS lessens the fundamental flaw

demos
